The link to the webcast of the conference call will be posted in the [Events & Presentations](#) section of the Company's website. The conference call may also be accessed by dialing (833) 519-1340 (domestic) or (914) 800-3902 (international) five minutes prior to the start of the call and providing the passcode 6186023. An archived replay will be accessible for 90 days following the event.

### **About Pliant Therapeutics, Inc.**

Pliant is a clinical stage biopharmaceutical company focused on discovering and developing novel therapies for the treatment of fibrotic and related diseases. Pliant's lead product candidate, PLN-74809, is an oral small-molecule dual selective inhibitor of  $\alpha v\beta 6$  and  $\alpha v\beta 1$  integrins that is in development for the treatment of idiopathic pulmonary fibrosis, or IPF, and primary sclerosing cholangitis, or PSC. PLN-74809 has received Orphan Drug Designation from the U.S. Food and Drug Administration for both IPF and PSC. Pliant is currently recruiting for Phase 2a trials of PLN-74809 in the lead indications of IPF and PSC. Pliant has also developed PLN-1474, a small-molecule selective inhibitor of  $\alpha v\beta 1$  for the treatment of nonalcoholic steatohepatitis, or NASH with liver fibrosis, which Pliant has transferred to Novartis pursuant to its development partnership. In addition to clinical stage programs, Pliant currently has two preclinical programs targeting oncology and muscular dystrophies.
