

Pliant Therapeutics Provides Corporate Update and Reports First Quarter 2024 Financial Results

05-06-2024 at 4:06 PM EDT

BEACON-IPF pivotal, adaptive Phase 2b/3 trial design implementation significantly accelerates bexotegrast development in IPF

Data from completed 12 week Phase 2a imaging trial measuring bexotegrast's effect on total lung collagen and FVC in IPF patients expected in the coming weeks

Regulatory clearance for muscular dystrophy program PLN-101325 received, allowing conduct of a first-in-human Phase 1 clinical study

SOUTH SAN FRANCISCO, Calif., May 06, 2024 (GLOBE NEWSWIRE) -- Pliant Therapeutics, Inc. (Nasdaq: PLRX), a late-stage clinical biotechnology company and leader in the discovery and development of novel therapeutics for the treatment of fibrotic diseases, today provided a corporate update and reported first quarter 2024 financial results.

"In the first quarter, we made significant progress across our portfolio, highlighted by the positive safety and exploratory efficacy data from our Phase 2a INTEGRIS-PSC trial, as well as completion of a Phase 2a PET imaging trial evaluating bexotegrast's effects on total lung collagen and lung function in IPF patients," said Bernard Coulie, M.D., Ph.D., President and Chief Executive Officer of Pliant Therapeutics. "Our strong execution has also allowed us to accelerate the ongoing BEACON-IPF Phase 2b trial through the implementation of an adaptive Phase 2b/3 design which will reduce the time to Phase 3 data by up to two years."

First Quarter and Recent Highlights

Bexotegrast Highlights

- Acceleration of bexotegrast development plan with implementation of BEACON-IPF as a pivotal, adaptive Phase 2b/3 trial in patients with idiopathic pulmonary fibrosis (IPF). The adaptive design implementation, based on acceptance by the European Union (EU) and other global health authorities, is expected to significantly shorten bexotegrast's late-stage development compared to standalone Phase 2b and Phase 3 trials. As part of the adaptive Phase 2b/3 implementation, the Phase 2b portion of BEACON-IPF was upsized from 267 patients to 360 patients. Enrollment is progressing and we expect to complete enrollment of the upsized Phase 2b study expected in the first quarter of 2025.
- Completion of a 12 week Phase 2a PET imaging trial, measuring the effects of bexotegrast on total lung collagen and forced vital capacity (FVC) in IPF patients. This randomized, double-blind, placebo-controlled trial (NCT05621252) was conducted at Massachusetts General Hospital. The trial's primary endpoint is the change in total lung collagen in 10 participants with IPF following once-daily treatment with bexotegrast at 160 mg for 12 weeks. Collagen will be evaluated with PET imaging, utilizing a collagen-binding probe. The secondary endpoint is safety and tolerability. Exploratory endpoints include change in FVC, cough severity and fibrosis biomarkers. Conduct of this trial has been completed, with topline data expected in the coming weeks.
- Completion of INTEGRIS-PSC Phase 2a trial in patients with primary sclerosing cholangitis (PSC) with data readout expected mid-year. As previously announced, at a once-daily dose of 320 mg, bexotegrast was well tolerated over 12 weeks of treatment with no drug-related severe or serious adverse events. At the 320 mg dose, bexotegrast reduced both Enhanced Liver Fibrosis (ELF) scores and PRO-C3 levels and showed improvements in hepatocyte function and bile flow by contrast MRI imaging relative to placebo at Week 12. The final 24-week data readout from the 320 mg dose group is expected in mid-2024.

Pipeline Programs

- Muscular dystrophy program cleared for conduct of Phase 1 study. PLN-101325 is a monoclonal antibody designed to act as an allosteric agonist of integrin α7β1. The Company recently received regulatory clearance from Australia's Research Ethics Committee (HREC) for the conduct of a first-in-human Phase 1 clinical study of PLN-101325 which is being developed as a potential treatment for muscular dystrophies, including Duchenne muscular dystrophy (DMD).
- Phase 1 trial of PLN-101095 in solid tumors is progressing with dosing of the third of five cohorts. PLN-101095 is an oral, small molecule, dual selective inhibitor of ανβ8 and ανβ1 integrins designed to block TGF-β activation in the tumor microenvironment. The Company is currently enrolling the third of five cohorts in the Phase 1 open label, dose-escalation trial of PLN-101095 as monotherapy and in combination with pembrolizumab in patients with solid tumors that are resistant to immune checkpoint inhibitors. Preliminary data could be available as early as late 2024.

Loan facility with Oxford Finance LLC (Oxford), upsized by \$50 million to a total of \$150 million of available
non-dilutive capital. To date, the Company has drawn a total of \$30 million from the facility. The remaining funds
available under this facility, along with the Company's March 31, 2024 cash and cash equivalents and short-term
investments of \$483.9 million are expected to fund Pliant's anticipated operating expenses and capital expenditure
requirements through 2026.

First Quarter 2024 Financial Results

- Research and development expenses were \$37.1 million, as compared to \$29.3 million for the prior-year quarter. The
 increase was due primarily to higher employee-related expenses and increased clinical and manufacturing-related costs
 associated with our lead program, bexotegrast, partially offset by a decrease in preclinical manufacturing costs for our
 pipeline product candidates.
- General and administrative expenses were \$15.2 million, as compared to \$14.2 million for the prior-year quarter. The increase was due to higher employee-related expenses.
- Net loss of \$47.0 million as compared to \$37.5 million for the prior-year quarter. The increase was due to higher operating expenses coupled with a decrease in collaboration revenues under the Novartis agreement during the quarter.
- As of March 31, 2024, the Company had cash, cash equivalents and short-term investments of \$483.9 million.

About Pliant Therapeutics, Inc.

Pliant Therapeutics is a late-stage biopharmaceutical company and leader in the discovery and development of novel therapeutics for the treatment of fibrotic diseases. Pliant's lead product candidate, bexotegrast (PLN-74809), is an oral, small molecule, dual selective inhibitor of ανβ6 and ανβ1 integrins that is in development in the lead indications for the treatment of idiopathic pulmonary fibrosis, or IPF, and primary sclerosing cholangitis, or PSC. Bexotegrast has received Fast Track Designation and Orphan Drug Designation from the U.S. Food and Drug Administration (FDA) in IPF and PSC and Orphan Drug Designation from the European Medicines Agency in IPF and PSC. Pliant has initiated BEACON-IPF, an adaptive Phase 2b/3 trial of bexotegrast in IPF. Pliant is conducting a Phase 1 study for its third clinical program, PLN-101095, a small molecule, dual-selective inhibitor of ανβ8 and ανβ1 integrins, that is being developed for the treatment of solid tumors. In addition, Pliant has received regulatory clearance for the conduct of a Phase 1 study of PLN-101325, a monoclonal antibody agonist of integrin α7β1 targeting muscular dystrophies. Forward-Looking Statements

Statements contained in this press release regarding matters that are not historical facts are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "may," "will," "expect," "anticipate," "estimate," "intend," and similar expressions (as well as other words or expressions referencing future events, conditions, or circumstances) are intended to identify forward-looking statements. These statements include those regarding the safety, tolerability, pharmacodynamics and therapeutic potential of bexotegrast; our expectation that the expansion of BEACON-IPF Phase 2b Trial into a pivotal, adaptive Phase 2b/3 Trial will significantly accelerate bexotegrast's late-stage development compared to a traditional Phase 3 trial and potentially shorten the time to Phase 3 data; our plans for the future development of bexotegrast, PLN-101325 and PLN-101095; bexotegrast's potential to become a treatment for IPF or PSC; the anticipated timing of data and progress from our clinical studies and public announcements related thereto; discussions with regulatory authorities; our access to future capital under the Oxford debt facility and the sufficiency of our cash runway to fund operations through the 2026. Because such statements deal with future events and are based on our current expectations, they are subject to various risks and uncertainties and actual results, performance or achievements of Pliant Therapeutics could differ materially from those described in or implied by the statements in this press release. These forward-looking statements are subject to risks and uncertainties, including those related to the development and commercialization of our product candidates, including any delays in our ongoing or planned preclinical or clinical trials, the impact of current macroeconomic and marketplace conditions, including the effects of COVID-19, on our business, operations, clinical supply and plans, our reliance on third parties for critical aspects of our development operations, the risks inherent in the drug development process, the risks regarding the accuracy of our estimates of expenses and timing of development, our capital requirements and the need for additional financing, including the availability of additional term loans under our loan facility, and our ability to obtain and maintain intellectual property protection for our product candidates. These and additional risks are discussed in the sections titled "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Quarterly Report on Form 10-Q for the period ended March 31, 2024 which we are filing with the SEC today, available on the SEC's website at www.sec.gov. Unless otherwise noted, Pliant is providing this information as of the date of this news release and does not undertake any obligation to update any forward-looking statements contained in this document as a result of new information, future events or otherwise.
